As a self-taught software engineer with a decade of experience, I specialize in React.js, React Native, Node/Express, and the JavaScript/TypeScript ecosystem. Throughout my career, I have successfully led the development of products for fast-paced startups, handling mainly frontend and mobile development responsibilities. I thrive in collaborative environments where I can contribute to end-to-end feature development and drive the growth of impactful products.

PROFESSIONAL EXPERIENCE

Decisiv / Michelin – Senior Software Engineer; Remote

Sep 2019 – Present

- Scaled and improved the frontend of Michelin's OnCall service in North America, leveraging React.js and Apollo GraphQL, including user interfaces for service tracking and connecting fleets with service providers.
- Proposed and implemented feature enhancements and adjustments, prioritizing stability, accessibility, and ease-of-use, leading to a significant increase in productivity and improved client satisfaction.
- Played a key role in fostering collaboration, knowledge sharing, and problem-solving by actively engaging in code pairing with senior backend and frontend developers, successfully resolving complex issues, and driving project success.

StayCircles – Lead Frontend Engineer; Remote

Oct 2016 – Aug 2019

- Led frontend and mobile engineering for two products: a cutting-edge Airbnb-like social web and mobile platform and a mobile app for finding affordable flight tickets.
- Designed, coded, and delivered multiple applications in a fast-paced environment, using React Native for sharing code across platforms, resulting in faster time-to-market and product iteration.
- Automated the CI/CD pipeline utilizing CircleCI, enabling efficient testing and deployment on AWS CloudFront, and seamless publication on the App Store and Google Play Store.
- Spearheaded the ideation and execution of features and improvements, integrating design and code across web and mobile platforms, driving product evolution and user engagement.
- Guided and mentored a team of frontend and mobile developers, offering support and assistance in overcoming coding challenges.

Spacemapp – Co-founder / Software Engineer; Curitiba, PR (Brazil)

Apr 2015 – Oct 2016

- Co-founded an innovative app with a mission to empower individuals to discover events in their city, cultivating a lively local culture and fostering meaningful community connections while driving visibility for local businesses.
- Achieved recognition by SEBRAE, Brazil's esteemed national support service for micro and small enterprises, through selection into their startup pre-acceleration program Epifania 2016 in Curitiba.
- Orchestrated the end-to-end development of web and mobile apps, with Ruby on Rails on the backend and real-time interfaces using React and React Native to create highly interactive web and mobile frontends.
- Designed interfaces in Figma with UX research and best practices.

Dois Padrinhos – Web Developer; Curitiba, PR (Brazil)

Oct 2012 – Mar 2014

- Utilized existing platforms to rapidly design, develop, and launch a highly functional and responsive e-commerce and blog website using WordPress, WooCommerce, JavaScript, HTML5, and CSS3.
- Integrated critical e-commerce components, including payments, shipping fees, order tracking, invoicing, and authentication, optimizing user convenience and driving revenue growth.
